European Community Directive
on the Conservation of Natural Habitats
and of Wild Fauna and Flora
(92/43/EEC)

Fourth Report by the United Kingdom
under Article 17

on the implementation of the Directive
from January 2013 to December 2018

Conservation status assessment for the habitat:

H3140 - Hard oligo-mesotrophic waters with benthic vegetation of Chara spp.

UNITED KINGDOM
IMPORTANT NOTE - PLEASE READ

• The information in this document represents the UK Report on the conservation status of this habitat, submitted to the European Commission as part of the 2019 UK Reporting under Article 17 of the EU Habitats Directive.

• It is based on supporting information provided by the geographically-relevant Statutory Nature Conservation Bodies, which is documented separately.

• The 2019 Article 17 UK Approach document provides details on how this supporting information contributed to the UK Report and the fields that were completed for each parameter.

• The reporting fields and options used are aligned to those set out in the European Commission guidance.

• Maps showing the distribution and range of the habitat are included (where available).

• Explanatory notes (where provided) are included at the end. These provide additional audit trail information to that included within the UK assessments. Further underpinning explanatory notes are available in the related country-level and/or UK offshore-level reports.

• Some of the reporting fields have been left blank because either: (i) there was insufficient information to complete the field; and/or (ii) completion of the field was not obligatory.

• The UK-level reporting information for all habitats and species is also available in spreadsheet format.

Visit the JNCC website, https://jncc.gov.uk/article17, for further information on UK Article 17 reporting.
## National level

### 1. General information

<table>
<thead>
<tr>
<th>1.1 Member State</th>
<th>UK</th>
</tr>
</thead>
<tbody>
<tr>
<td>1.2 Habitat code</td>
<td>3140 - Hard oligo-mesotrophic waters with benthic vegetation of Chara spp.</td>
</tr>
</tbody>
</table>

### 2. Maps

<table>
<thead>
<tr>
<th>2.1 Year or period</th>
<th>1983-2017</th>
</tr>
</thead>
<tbody>
<tr>
<td>2.3 Distribution map</td>
<td>Yes</td>
</tr>
<tr>
<td>2.3 Distribution map Method used</td>
<td>Based mainly on extrapolation from a limited amount of data</td>
</tr>
<tr>
<td>2.4 Additional maps</td>
<td>No</td>
</tr>
</tbody>
</table>

### 3. Biogeographical and marine regions

#### 3.1 Biogeographical or marine region where the habitat occurs

Atlantic (ATL)

#### 3.2 Sources of information

- England
  - Natural England CMSi condition data
- Scotland
- Previous report
- SCM Database
- Wales
Report on the main results of the surveillance under Article 17 for Annex I habitat types (Annex D)

Joint Nature Conservation Committee. 2007. Second Report by the UK under
Report on the main results of the surveillance under Article 17 for Annex I habitat types (Annex D)

Article 17 on the implementation of the Habitats Directive from January 2001 to December 2006. Peterborough: JNCC. Available from: www.jncc.gov.uk/article17
N.Ireland
4. Range

4.1 Surface area (in km²) 61310.25
4.2 Short-term trend Period 2007-2018
4.3 Short-term trend Direction Stable (0)
4.4 Short-term trend Magnitude a) Minimum
4.5 Short-term trend Method used Based mainly on extrapolation from a limited amount of data
b) Maximum
4.6 Long-term trend Period
4.7 Long-term trend Direction
4.8 Long-term trend Magnitude a) Minimum
4.9 Long-term trend Method used b) Maximum
4.10 Favourable reference range a) Area (km²) 61310.25
b) Operator No
c) Unknown
4.11 Change and reason for change in surface area of range The FRR is approximately equal to the current range area. The FRR value has been updated to take account of improved information on the habitat range. The approach taken to set the FRR is explained in the 2007 and 2013 UK Article 17 habitat reports (see http://jncc.defra.gov.uk/page-4064 and http://jncc.defra.gov.uk/page-6563).
4.12 Additional information Improved knowledge/more accurate data

5. Area covered by habitat

5.1 Year or period 1983-2017
5.2 Surface area (in km²) a) Minimum 12.125 b) Maximum c) Best single value
5.3 Type of estimate Minimum
5.4 Surface area Method used Based mainly on expert opinion with very limited data
5.5 Short-term trend Period 2007-2018
6.7 Typical species Method used
Base mainly on extrapolation from a limited amount of data

5.9 Long-term trend Period

5.10 Long-term trend Direction
Stable (0)

5.11 Long-term trend Magnitude
a) Minimum
b) Maximum
c) Confidence interval

5.12 Long-term trend Method used

5.13 Favourable reference area

5.14 Change and reason for change in surface area of range
Improved knowledge/more accurate data
The change is mainly due to: Improved knowledge/more accurate data

6. Structure and functions

6.1 Condition of habitat
a) Area in good condition (km²) Minimum 4.57 Maximum
b) Area in not-good condition (km²) Minimum 2.9 Maximum

6.2 Condition of habitat Method used
Based mainly on extrapolation from a limited amount of data

6.6 Typical species Has the list of typical species changed in comparison to the previous reporting period? No

6.7 Typical species Method used

6.8 Additional information
There is insufficient information to report on the maximum area of habitat in unfavourable (not good) condition. Nevertheless, based on the area that has been assessed, 39% is in unfavourable condition.

7. Main pressures and threats

7.1 Characterisation of pressures/threats
Pressure Ranking
Agricultural activities generating point source pollution to surface or ground waters (A25) M
### 7.2 Sources of information

### 7.3 Additional information

#### 8. Conservation measures

<table>
<thead>
<tr>
<th>Threat</th>
<th>Ranking</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agricultural activities generating point source pollution to surface or ground waters (A25)</td>
<td>M</td>
</tr>
<tr>
<td>Agricultural activities generating diffuse pollution to surface or ground waters (A26)</td>
<td>M</td>
</tr>
<tr>
<td>Discharge of urban waste water (excluding storm overflows and/or urban run-offs) generating pollution to surface or ground water (F12)</td>
<td>M</td>
</tr>
<tr>
<td>Management of fishing stocks and game (G08)</td>
<td>M</td>
</tr>
<tr>
<td>Invasive alien species of Union concern (I01)</td>
<td>M</td>
</tr>
<tr>
<td>Other invasive alien species (other than species of Union concern) (I02)</td>
<td>M</td>
</tr>
<tr>
<td>Mixed source pollution to surface and ground waters (limnic and terrestrial) (J01)</td>
<td>H</td>
</tr>
<tr>
<td>Modification of hydrological flow (K04)</td>
<td>M</td>
</tr>
<tr>
<td>Temperature changes (e.g. rise of temperature &amp; extremes) due to climate change (N01)</td>
<td>M</td>
</tr>
</tbody>
</table>

#### 8.1 Status of measures

- a) Are measures needed? Yes
- b) Indicate the status of measures Measures identified and taken

#### 8.2 Main purpose of the measures taken

Maintain the current range, population and/or habitat for the species

#### 8.3 Location of the measures taken

Both inside and outside Natura 2000

#### 8.4 Response to the measures

Medium-term results (within the next two reporting periods, 2019-2030)

#### 8.5 List of main conservation measures

Reduce diffuse pollution to surface or ground waters from agricultural activities (CA11)
**Report on the main results of the surveillance under Article 17 for Annex I habitat types (Annex D)**

Reduce impact of outdoor sports, leisure and recreational activities (CF03)

Manage water abstraction for public supply and for industrial and commercial use (CF11)

Reduce impact of mixed source pollution (CJ01)

Adopt climate change mitigation measures (CN01)

### 8.6 Additional information

### 9. Future prospects

#### 9.1 Future prospects of parameters

<table>
<thead>
<tr>
<th>Parameter</th>
<th>Trend</th>
</tr>
</thead>
<tbody>
<tr>
<td>a) Range</td>
<td>Good</td>
</tr>
<tr>
<td>b) Area</td>
<td>Good</td>
</tr>
<tr>
<td>c) Structure and functions</td>
<td>Bad</td>
</tr>
</tbody>
</table>

#### 9.2 Additional information

Future trend of Range is Overall stable; Future trend of Area is Overall stable; and Future trend of Structure and functions is Overall stable

### 10. Conclusions

#### 10.1 Range

Favourable (FV)

#### 10.2 Area

Favourable (FV)

#### 10.3 Specific structure and functions (incl. typical species)

Unfavourable - Bad (U2)

#### 10.4 Future prospects

Unfavourable - Bad (U2)

Unfavourable - Bad (U2)

#### 10.5 Overall assessment of Conservation Status

Stable (=)

#### 10.6 Overall trend in Conservation Status

- a) Overall assessment of conservation status
  
  No change

  The change is mainly due to:

  - b) Overall trend in conservation status
    
    No change

    The change is mainly due to:

#### 10.7 Change and reasons for change in conservation status and conservation status trend

Conclusion on Range reached because: (i) the short-term trend direction in Range surface area is stable; and (ii) the current Range surface area is approximately equal to the Favourable Reference Range.

Conclusion on Area covered by habitat reached because: (i) the short-term trend direction in Area is stable; and (ii) the current Area is approximately equal to the Favourable Reference Area.

Conclusion on Structure and functions reached because habitat condition data indicates that more than 25% of the habitat is in unfavourable (not good) condition.

Conclusion on Future prospects reached because: (i) the Future prospects for Range are good; (ii) the Future prospects for Area covered by habitat are good; and (iii) the Future prospects for Structure and functions are bad.

Overall assessment of Conservation Status is Unfavourable-bad because one or more of the conclusions is Unfavourable-bad.

Overall trend in Conservation Status is based on the combination of the short-term trends for Range - stable, Area covered by habitat - stable, and Structure
Report on the main results of the surveillance under Article 17 for Annex I habitat types (Annex D)

and functions - stable.

11. Natura 2000 (pSCIs, SCIs, SACs) coverage for Annex I habitat types

<table>
<thead>
<tr>
<th>11.1 Surface area of the habitat type inside the pSCIs, SCIs and SACs network (in km² in biogeographical/marine region)</th>
<th>a) Minimum b) Maximum c) Best single value 5.545</th>
</tr>
</thead>
<tbody>
<tr>
<td>11.2 Type of estimate</td>
<td>Minimum</td>
</tr>
<tr>
<td>11.3 Surface area of the habitat type inside the network Method used</td>
<td>Based mainly on extrapolation from a limited amount of data</td>
</tr>
<tr>
<td>11.4 Short-term trend of habitat area in good condition within the network Direction</td>
<td>Stable (0)</td>
</tr>
<tr>
<td>11.5 Short-term trend of habitat area in good condition within network Method used</td>
<td>Based mainly on extrapolation from a limited amount of data</td>
</tr>
<tr>
<td>11.6 Additional information</td>
<td></td>

12. Complementary information

| 12.1 Justification of % thresholds for trends | |
| 12.2 Other relevant information | |
Figure 1: UK distribution map for H3140 - Hard oligo-mesotrophic waters with benthic vegetation of *Chara* spp. Coastline boundary derived from the Oil and Gas Authority's OGA and Lloyd's Register SNS Regional Geological Maps (Open Source). Open Government Licence v3 (OGL). Contains data © 2017 Oil and Gas Authority.

The 10km grid square distribution map is based on available habitat records which are considered to be representative of the distribution within the current reporting period. For further details see the 2019 Article17 UK Approach document.
Figure 2: UK range map for H3140 - Hard oligo-mesotrophic waters with benthic vegetation of *Chara* spp. Coastline boundary derived from the Oil and Gas Authority's OGA and Lloyd's Register SNS Regional Geological Maps (Open Source). Open Government Licence v3 (OGL). Contains data © 2017 Oil and Gas Authority.

The range map has been produced by applying a bespoke range mapping tool for Article 17 reporting (produced by JNCC) to the 10km grid square distribution map presented in Figure 1. The alpha value for this habitat was 25km. For further details see the 2019 Article 17 UK Approach document.
